

Play It Safe!

If you find something and you're not sure what it is, remember these safety tips:

- If a poison spills on you, rinse well with water and tell an adult immediately!
- Tell an adult if you find household cleaners. They should be stored in locked cabinets out of a child's reach.
- Ask first. Only an adult can tell if something is safe to touch or eat.
- If you inhale toxic fumes, get to fresh air quickly.
- Call Poison Control (1-800-222-1222) immediately if someone has swallowed something harmful.

DANGER RANGERS®

Tell an adult if you find household cleaners.
They should be stored in locked cabinets out of a child's reach.
